

Lightweight ABS Folding Tables by MityLite™

These tables revolutionized the industry by introducing a better option over heavy, plywood tables. They are strong, durable, ABS plastic tables, which comfortably hold over 1600 lbs., yet a 30" x 72" table, weighs only 42 lbs. These tables will save you time and money. We offer over 50 different sizes with a variety of color and leg options. They come in rectangular, round, half-round, quarter round and serpentine shapes. The standard edge accommodates standard skirting clips.

High Impact ABS Surface

Tabletop is thermoformed from high-impact ABS plastic in a variety of textures and colors.

Patented Sub-surface

Unique sub-surface provides moderate heat shielding and keeps table surface smooth and flat.

Hardwood Strength & Stability

Inner hardwood leg supports consist of alder for superior strength and performance.

Heavy Duty ABS Edge

Internal ABS edge support reinforces top and bottom ABS shells, for a tough impact resistant edge.

Permanently Bonded

Top and bottom ABS shells are permanently bonded to sub-surface and strong inner hardwood supports.

Strong Leg Attachments

16 gauge steel leg brackets are bolted metal to-metal into steel T-nut fasteners. Each anti-spin fastener is embedded into the internal hardwood frame.

Supports Heavy Loads

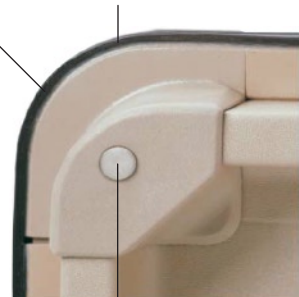

Unique combination of engineered supports and LVL wood runners help sustain an evenly distributed load of 1600+ pounds, yet a 30" x 72" Mity-Lite table weighs only 41 pounds!

Welded Trim

Trim is chemically welded to the entire perimeter of the table, fusing top and bottom plastic shells and sealing out moisture.

Impact-Resistant Corners

Injection molded ABS corners are designed for shock absorption—withstanding a 2-foot corner drop with no structural damage!

Safe Non-Slip Stacking

Replaceable rubber anti-skid pads keep tables from sliding when stacked.
