

NPS200 • 100 • 5200 Premium Steel Folding Chairs

Our best selling model, the 200 series features our unique full size back, which has a double contour to support your entire back. The seat features a waterfall front. The frame is made of 18 gauge steel tubing with two riveted cross

braces, one in the front and one in the back. Each cross brace has 2 rivets connected to each leg. On each side we have two hinges for added stability and durability. The rear leg caps are V-shaped, also for added stability.

Made with your comfort in mind, the 100 series features our unique full size double contoured back and a waterfall seat. Single hinge linking front to rear legs. The frame is 18 gauge 7/8" round tubing; with two 19 gauge 5/8" U-shaped cross braces, which make the chair durable and stable. Glides and V-shaped stability plugs are color matched.

We've taken our best selling series 200 folding chair and added a folding tablet-arm writing surface.

Fold the chair and the tablet-arm folds up against the chair for very compact storage. Tablet is 5/8" thick particleboard with high pressure laminate. Choose from either left or right handed. Beige chair with Light Oak writing surface and black edgebanding; or Gray chair with Gray writing surface and black edgebanding. Tablet-arm measures 22"L x 11"W. Folded depth 4".
